

CS-06 Clima sensor

Resistant probe for measuring of air temperature and humidity, with cable.

Operating instruction:

1. Climatic probe CS-06 with Mini-USB plug and 70cm cable. Connect cable into the destined socket at the measurement device.
2. Make sure that there is a free aircirculation through the ventilation holes.
3. Read out the measured value of the measurement device. After usage make sure to properly store the device to protect the sensors.
4. Measuring range:
 - 10°C – 50°C (Tol: +/- 0,3 degree)
 - 10 – 99% Relative Humidity (Tol: +/- 2% RH).
5. Accessory for VI-D4.
